Some of our EV Charger Brands

Europe's largest range of EV charging solutions. With products that start at just 7.4kW through to major commercial installations in excess of 150kW, Rolec have an EV charging solution that will suit every application.

With full WiFi / Internet connectivity & an innovative smart charging app, the features of the Rolec range are hard to beat.

All Rolec charging solutions are UK Smart Charge compliant, IP54 & IK08 rated and are of course easy to install & maintain.

Ready to enter the future of electric vehicle charging? The Project EV APEX-7S 7.3kW Fast AC Single Charger is designed to make your life easier. With its untethered design, you have the flexibility to plug in any cable that fits a Type 2 socket. Operating at a voltage of 230V and a frequency of 50/60Hz, it can deliver a maximum current of 32A, translating to a 7.3kW rated power output for faster charging times.

Built for durability, the charger comes with an IP65 rating for water and dust resistance, making it ideal for both indoor and outdoor installations. Additionally, the IK08 impact rating ensures that the charger is robust enough to withstand external influences..

The NEW Sync-EV EVWC2S7G - Wi-Fi & Ethernet come as standard, featuring a type 2 socket with auto-lock, Dynamic charging - up to 7.4 kW (32A). Interchangeable face plates are available, change the shade or colour.

Improved ease of installation, Fully compliant with the latest Electric Vehicles (Smart Charge Points) Regulations, Suitable for residential and commercial use, Two base and rear entry points, Full smart functionality and OCPP 1.6J connectivity

No earth rod required - integrated open PEN conductor protection, Type A RCD (30mA AC + 6mA DC), Integrated Class C power meter, with option for external MID meter. **3-year warranty**

New to EV? Contact us with your requirements & we are happy to advise on the best unit for your specific application.
